WHERE TRADITION MEETS TOMORROW

PRESTIGE

Unleash the Potential of Any Space

PRESTIGE is a versatile modular lighting system designed for exceptional adaptability. Combine any PRESTIGE luminaire variant to create the perfect configuration for your needs. And the flexibility doesn't stop there. Incorporate a range of functional accessories like speakers, power outlets, and even emergency kits to bring your vision to life. PRESTIGE seamlessly integrates with various environments, making it the ideal choice for any application.

The **PRESTIGE SYSTEM** embodies the ultimate in its capability to adapt to the most demanding and complex mix of lighting needs.

This is the future of large-area lighting

Clearly innovative. Extremely effective. Surprisingly simple.

Unparalleled Adaptability Meets Uncompromising Performance: Unleash the Power of PRESTIGE. PRESTIGE redefines adaptability in lighting solutions. This modular system empowers you to build the perfect configuration for any space, regardless of size, layout, or purpose. Combine any variant of PRESTIGE luminaires to meet your specific needs, from sleek pendants to robust downlights, all seamlessly integrated within the system.

The flexibility extends beyond lighting. PRESTIGE offers a comprehensive suite of functional accessories, including speaker systems, power outlets, emergency kits, and energy-saving sensors. This allows you to create a truly integrated environment, fostering functionality and convenience within your space.

With PRESTIGE, you gain unmatched adaptability and uncompromising performance, guaranteeing a lighting solution that seamlessly blends into any environment, perfectly catering to your specific needs and fostering a functional, well-illuminated space.

But PRESTIGE isn't just about versatility. Its core lies in high-performance illumination. Utilizing state-of-the-art LEDs and a diverse range of optical systems, PRESTIGE delivers exceptional light distribution and efficiency. Choose from various configurations, each tailored to achieve specific effects, whether you require focused beams, uniform illumination, or specialized diffusers for unique applications.

PRESTIGE NANO

High-performance LEDs using micro prismatic, opal, or nanostructure diffuser, 6 different lighting curves.

PRESTIGE ONE

High-performance one-row LEDs using lenses or opal diffuser, 6 different lighting curves.

PRESTIGE offers versatile mounting choices. Choose between surface or suspended installations, utilizing easily connectable pre-wired rails for a seamless configuration. End pieces and covers, available with or without integrated accessories, provide the ultimate flexibility to tailor the system to your specific needs and aesthetic preferences.

PRESTIGE LS

High-performance LEDs using lenses, 7 different lighting curves.

PRESTIGE LSP

High-performance LEDs using lenses with higher protection IP, 3 different lighting curves.

Design and functionality

PRESTIGE is no exception, beautiful in its simplicity.

While often taken for granted due to its functional role overhead, lighting significantly influences a space's ambiance. Just as with any design element, it subtly shapes the atmosphere, making it crucial to consider the aesthetic impact of light alongside its practical purpose.

LUMINAIRE CONNECTION TO THE RAIL

PRESTIGE LED also comes with a new connection method. Simply take the complete luminaire unit and connect it to the rail by twisting the locking lever. That's it. Job done!

For over 15 years, the PRESTIGE SYSTEM has been a cornerstone of the OMS portfolio, earning its place as a customer favorite. This long-standing success is a testament to its versatility and adaptability, encompassing a diverse range of ceiling-mounted and suspended modular luminaires.

However, the time for innovation has arrived! While the core strengths of PRESTIGE remain, exciting updates are on the horizon, promising to elevate this already exceptional system to even greater heights. Stay tuned to discover what's next for PRESTIGE!

Housing and materials

A finishing touch to your lighting installation, the mounting rail end-caps are made from ABS.

Made of high quality 0.6 mm calendared sheet steel and finished with polyester resin paint, mounting rails are provided in various sizes suitable for the installation of one, two or three luminaires per section.

The device mount is easily connected to the rail using an intuitive and simple lever locking system and finished with a matching polyester resin paint.

Mounting rails can be connected using simple to install brackets made of zinc-coated sheet steel.

The high-power LEDs and PCB used are the main reason why PRESTIGE luminaires are so efficient and effective.

PRESTIGE LS / PRESTIGE LSP / PRESTIGE ONE
Optimized lens arrays carefully direct the light emitted from each LED as needed, ensuring an excellent level of optical efficiency.

PRESTIGE NANO / PRESTIGE ONE
The balanced optical system uses a diffuser to carefully direct the light emitted from the LEDs as needed, ensuring an excellent level of optical efficiency. Nanotechnology is used for higher demands of light direction.

Electronics

PRESTIGE is just so simple that almost anyone can install it.

Unveiling the Power of Choice: PRESTIGE Driver and Trunking Options

PRESTIGE empowers you to personalize your lighting experience with a range of electronic control gear and trunking options.

Electronic control gear Selection

FIX electronic control gear (ECG, SCG): This non-dimmable driver offers a cost-effective solution for basic lighting needs. Manually settable control gear (SCG) enables the changing power of the luminaire to the customer selection from possible variants.

DALI electronic control gear (EDA): Embrace the power of dimming and comprehensive control. This driver integrates seamlessly with sensors, timers, calendars, and lighting scenes, allowing you to create personalized lighting experiences. Additionally, it facilitates integration with Building Management Systems for centralized control and optimization.

Unveiling Trunking Flexibility

The pre-wired trunking system, featuring a 2.5 mm² cross-section, offers various configurations for optimal performance and functionality.

5-Pole Trunking

Ideal for simple operation with three-phase power or two-phase power combined with emergency lighting.

7-Pole Trunking

This option allows for three-phase operation along with either LMS (Lighting Management System) or emergency lighting. Alternatively, it can be used for two-phase operation with both LMS and emergency lighting, providing greater control and adaptability.

11-Pole Trunking

This advanced option caters to three-phase operation, LMS integration, emergency lighting, and even the power supply for additional devices like sensors and cameras, maximizing the system's functionality and futureproofing your lighting solution. With PRESTIGE, you gain unmatched control and flexibility, ensuring a lighting system that caters to your specific needs and empowers you to create a truly personalized and dynamic lighting experience.

PRESTIGE luminaires come standard with high-performance LEDs, boasting a color rendering index (CRI) of 80+ and correlated color temperature (CCT) options of 3000K or 4000K. These settings deliver balanced light quality for various applications. For even greater customization, tailor your lighting experience by requesting CRI 90+ or a wider CCT range from 2700K to 6500K, catering to specific needs and creating the desired ambiance.

Optic

Suitable for a wide range of uses

Unveiling the Brilliance of PRESTIGE Optics: LS, LSP, ONE, and NANO

PRESTIGE offers a spectrum of advanced optical systems, each tailored to deliver exceptional light quality and performance.

PRESTIGE LS and LSP: These innovative systems utilize high-precision PMMA lens arrays, meticulously designed through cutting-edge digital techniques. These lenses ensure precise light distribution, maximizing efficiency and minimizing waste. Compared to conventional optics, they offer superior light beam transmission and management. This translates to sharper beams, uniform illumination, and minimized glare, resulting in a more comfortable and visually appealing lighting experience.

PRESTIGE NANO: For applications requiring a soft and diffused light, employs a sophisticated diffuser or nanostructure combination on the diffuser. Strategically positioned beneath the LEDs, this diffuser softens the light, eliminating harsh shadows and creating a homogenous glow.

PRESTIGE ONE offers the flexibility of using either lenses or an opal diffuser.

MICROPRISMATIC diffuser (MCD)

With the near-ideal photometric and perfect glare control, the uni-directional structure gives for a uniform appearance. Suitable for computer workstations, offices.

Prestige

Redefining Lighting, One Luminaire at a Time

A Class Above: PRESTIGE Lighting, Where Innovation Meets Performance

PRESTIGE luminaires aren't just another option; they represent a quantum leap in lighting technology. Unlike traditional systems, PRESTIGE utilizes optics designed specifically for LEDs, enabling superior control over the light emitted by these tiny sources. This translates to a multitude of benefits that extend far beyond simply capturing the light.

Unveiling Enhanced Capabilities

The strategic use of lenses and cutting-edge diffuser materials unlocks a range of crucial advantages:

- Optimised Transmission: More light reaches its intended target, maximizing efficiency and minimizing wasted energy.
- Enhanced Durability: The materials chosen for diffusers ensure exceptional longevity even in demanding environments.
- Unmatched Versatility: PRESTIGE caters to diverse needs and applications with a wider range of design possibilities, allowing for customizable solutions tailored to specific requirements.
- This synergistic combination of advanced optics and materials allows PRESTIGE to be adaptable to virtually any need or application, ensuring optimal performance across various scenarios.

Experience the Difference

The first and most impactful difference you'll notice with PRESTIGE luminaires is the superior light quality. Improved light beam management ensures even distribution where needed, while minimizing glare. This means even the most stringent glare and lighting uniformity requirements are effortlessly met, creating a visually comfortable and productive environment.

Beyond Superiority, a Focus on Practicality

PRESTIGE transcends conventional lighting by incorporating low-cost, low-maintenance LED technology. These luminaires offer a truly "fit-and-forget" solution, thanks to:

- Long LED lifespans: Minimizing the need for frequent replacements.
- High-quality materials and construction: Ensuring long-lasting durability.

This translates to significant cost savings in various aspects:

- Reduced costs associated with light source changes.
- Lowered personnel costs for maintenance.
- Eliminating the inconvenience of accessing difficult-to-reach locations for replacements.

Adaptability at its Finest

Available with a wide range of light distributions and lumen packages, PRESTIGE luminaires offer a version suitable for almost any large-area lighting application. Additionally, the super-simple toolless installation and the option to include emergency units add further functionality and practicality for any use case.

PRESTIGE is more than just lighting; it's a culmination of innovation, performance, and practical considerations. It's a class above the rest, delivering a superior lighting experience with unmatched versatility and long-term cost efficiency.

For years, the PRESTIGE modular system has set the standard for functional, high-quality lighting. Now, we've taken it a step further. By incorporating cutting-edge, LED-specific optics, we've crafted a lens and diffuser system that delivers exceptional lighting performance. PRESTIGE isn't just an upgrade; it's a revolutionary approach to illumination, empowering you to create the perfect lighting environment for any space.

Component matrix

Mounting Rail

The Backbone of the Prestige System

The MR, or mounting rail, is a key component of the Prestige System, forming the foundation for quick and flexible electrical installation. Made from sturdy steel with a smooth paint finish, it comes in three standard lengths and can be customized for specific needs.

The rail's profile allows for easy wiring with various cable sizes (5 x, 7 x, or 11 x 2.5 mm²), and its intelligent connectors enable seamless, tool-free connections between multiple rails. Additionally, dedicated wiring connectors simplify the integration of luminaires into the system.

Pre-wired for Efficiency:

The Prestige System boasts pre-wired trunking, saving time and simplifying electrical setup. Standard 2.5 mm² cables are used, and connectors allow for effortless connection of both regular and emergency lighting, along with the potential integration of a Lighting Management System (LMS).

With its diverse wiring options and user-friendly design, the MR mounting rail and the Prestige System empower users to create efficient and adaptable lighting solutions for a wide range of applications.

The system offers several wiring configurations to cater to diverse project requirements:

5-pole:

Three-phase operation: Ideal for large buildings, this option enables long, uninterrupted lines and individual luminaire control for optimal energy savings.

Two-phase operation + emergency lighting: This configuration utilizes the spare conductor for emergency lighting, offering versatility for various applications.

7-pole:

Three-phase operation + Lighting Management System (LMS): This option leverages the additional conductors for dimmable electronic gears and continuous connection in long lines, with basic switching control.

Two-phase operation + emergency lighting + LMS: This configuration combines emergency lighting with the ability to integrate dimmable control gears.

11-pole:

The pinnacle of flexibility, this option offers unlimited possibilities beyond basic power, emergency lighting, and LMS. It allows for the seamless sequential integration of various systems, including sensors, control devices, additional lighting circuits, motion sensors, and even low-voltage power supplies for LMS components.

Accessories description

MRE **mounting rail ending piece**

A self-extinguishing ABS plastic cover is used to finish the open ending of the mounting rail. Ending pieces must be ordered separately, set is 2 pieces.

DM **Device mount**

A device mount is an MR cover, which includes a system device such as a lamp, sensor, camera, etc. The LED device mount is standardly attached directly to the mounting rail using two built-in clamps, which allow an easy installation without additional tools. Device mounts are made of calendared sheet steel with a white polyester resin paint surface finish.

The connector located on the control gear tray allows a simple electrical connection of the LED device to the mounting rail. It also enables phase selection (5-, 7- and 11-pole connection) using positioning a moveable contact. The mounting rail can be finished with a mounting rail cover plastic (MR COVER DM PLASTIC) or cover sheet steel (MR COVER DM) to eliminate a gap between the device mounts, the standard length is 1482 mm.

MRCP 02 **mounting rail connecting piece**

A standard connector that allows mechanical connection via insertion into mounting rail.

DM Track **device mount with track rail**

It is possible to combine the ONETRACK system with PRESTIGE for the incorporation of luminaires with a track connector (length 683 mm track rail), length 1482 mm.

MR COVER DM PLASTIC

MR COVER DM

MR L

MR T

MR X1

MR X2

MR L/T/X1/X2 **cross-shaped MR connector**

A cross-shaped mounting rail connector that allows mechanical and also electrical connection via insertion into other mounting rail parts. Made of zinc-coated sheet steel. Standardly supplied with a plastic cover and the necessary number of ending cap pieces.

MR L II **L-shaped MR corner connector**

A L-shaped mounting rail corner connector that allows mechanical and also electrical connection via insertion into another MR parts.

MR T II **T-shaped MR connector**

A T-shaped mounting rail connector that allows mechanical and also an electrical connection via insertion into other MR parts. Made of zinc-coated sheet steel.

Accessories description

**RSE 02
suspension with electric cable**
An adjustable rope is used for the suspension of the mounting rail along with cables for connection to the mains. Cables are standardly supplied with a length of 1000 mm.

**SB 02 T15
bracket for ceiling mounting**
A quick-fix bracket for mounting of the mounting rails in T-profile (15 mm) ceilings.

**MR B PSC/BDC
set of connectors**
PSC is a connector for the power supply, BDC is a blind connector for the ending of a line.

**RS 02
suspension**
An adjustable 1.5 mm diameter rope is used for the suspension of mounting rails. Standardly supplied with a length of 1000 mm, other lengths are available on request.

**SB 02 T24
bracket for ceiling mounting**
A quick-fix bracket for mounting of the mounting rails in T-profile (24 mm) ceilings.

**MR B PSCE/BDC
set connectors with electric wire**
PSCE is a connector for power supply + wires with WAGO terminals, BDC is a blind connector for the ending of a line.

**CHP 03
chain bracket**
Mounting bracket for suspension chains.

**CHS
chain suspension**
A chain is used for the suspension of mounting rails. Standardly supplied with a length of 800 mm, other lengths are available on request.

**SB 02
bracket for ceiling mounting**
A quick-fix bracket for mounting of the mounting rails on the ceiling.

Fly connector
In this design, the connector is not permanently installed on the device mount but is flexibly positionable in the MR due to cable installation.

Added variations of the system

Supplementary devices

Why not add sensors to your PRESTIGE installation? Various sensors can make different functions to your lighting system. It is easy to install on the rail and it ensures highly effective lighting with energy savings and added functionality. Easy to install on the rail, discreet, and highly effective, the additional functionality and energy savings ensured by their use makes adding sensors a viable and practical option.

And why not a camera or Wi-Fi device? By implementing additional devices, you can take the functionality of the system to a higher level, and thanks to easy installation into the Prestige system, you can upgrade quickly and efficiently.

Supplementary luminaires

Trax luminaires
The PRESTIGE SYSTEM enables the addition of trax luminaires directly on the same mounting rail as the PRESTIGE luminaires. This provides the perfect combination of practical and attention-grabbing lighting without complication. Ideal solution for all luminaires for the trax system.

Other luminaires
Even though the PRESTIGE LED has great technical, functional, and optical flexibility, other luminaires can be more suitable for your space. That's the reason why our PRESTIGE SYSTEM offers an option to use the same mounting rails and electrical infrastructure with the advantages of the luminaire you want, such as Tempera IP66, Lambda, Plast H IP44, Miline Slim and etc.

The lenses luminaire for the Prestige trunking system

Deep lenses (LDE)

Product description
PRESTIGE isn't just a lighting system; it's the future. Utilizing high-powered LEDs and advanced optical systems, PRESTIGE delivers efficient light distribution, making it suitable for diverse applications and spaces. Choose between surfaced or suspended mounting, and take advantage of easily connectable pre-wired rails, end pieces, and covers. Whether you need a luminaire with or without accessories, PRESTIGE adapts to your needs. The system allows for beam angle customization through various lenses or diffusers, ensuring perfect illumination for any environment.

Technical features:

- Housing: sheet steel
- Lenses: PMMA
- Accessories: components for system PRESTIGE
- Chromacity: 3-step MacAdam
- Colour rendering index: min. 80
- Colour temperature: 3000K, 4000K
- Electronic control gear: FIX (ECG), DALI (EDA), on request Emergency unit variant
- Service lifetime: 100,000 hours/L90/B50 (ta 25°C) - 42/76W
100,000 hours/L80/B10 (ta 25°C) - 114W
- Ambient temperature: Ta = -25°C...+35°C
- Degree of protection: IP20
- Dimensions: 1482 x 69 x 26 mm

Prestige LSP

The lenses luminaire for the Prestige trunking system

Extra wide lenses (LEW)

Product description

PRESTIGE isn't just a lighting system; it's the future. Utilizing high-powered LEDs and advanced optical systems, PRESTIGE delivers efficient light distribution, making it suitable for diverse applications and spaces. Choose between surfaced or suspended mounting, and take advantage of easily connectable pre-wired rails, end pieces, and covers. Whether you need a luminaire with or without accessories, PRESTIGE adapts to your needs. The system allows for beam angle customization through various lenses or diffusers, ensuring perfect illumination for any environment.

Technical features:

- Housing: sheet steel
- Lenses: PMMA (IP54)
- Accessories: components for system PRESTIGE
- Chromacity: 3-step MacAdam
- Colour rendering index: min. 80
- Colour temperature: 3000K, 4000K
- Electronic control gear: FIX (ECG), DALI (EDA), on request Emergency unit variant
- Service lifetime: 100,000 hours/L90/B50 (ta 25°C) - 41/72W
100,000 hours/L80/B10 (ta 25°C) - 92W
- Ambient temperature: Ta = -25°C...+35°C
- Degree of protection: IP20
- Dimensions: 1482 x 69 x 26 mm

Other performance variants on request.

PRESTIGE

Prestige One

The luminaire one-row LED for the Prestige trunking system

Opal diffuser (OPD)

Product description

PRESTIGE isn't just a lighting system; it's the future. Combining cutting-edge innovation with exceptional effectiveness, PRESTIGE offers surprisingly simple installation and maintenance. Utilizing high-powered LEDs and advanced optical systems, PRESTIGE delivers efficient light distribution, making it suitable for diverse applications and spaces. Choose between surfaced or suspended mounting, and take advantage of easily connectable pre-wired rails, end pieces, and covers. Whether you need a luminaire with or without accessories, PRESTIGE adapts to your needs. The system allows for beam angle customization through various lenses or diffusers, ensuring perfect illumination for any environment.

Technical features:

- Housing: sheet steel
- Diffuser: PMMA
- Accessories: components for system PRESTIGE
- Chromacity: 3-step MacAdam
- Colour rendering index: min. 80
- Colour temperature: 3000K, 4000K
- Electronic control gear: FIX Manually settable (SCG), FIX (ECG), DALI (EDA), on request Emergency unit variant
- Service lifetime: 100,000 hours/L90/B10 (ta 25°C)
- Ambient temperature: Ta = -25°C...+40°C
- Degree of protection: IP20
- Dimensions: 1482 x 69 x 40 mm

VIBA UV-C Prestige

PRESTIGE with Integrated UV-C Disinfection

Product description

Introducing a Higher Standard of Air Hygiene. Elevating the PRESTIGE system beyond exceptional lighting, we now introduce a powerful and convenient feature: integrated UV-C disinfection.

Seamless Integration

- **Effortless Installation:** The UV-C module seamlessly integrates with existing PRESTIGE rail systems, found in department stores, retail spaces, and industrial settings. This ensures simple and efficient implementation without disrupting your existing infrastructure.
- **Enhanced Transparency:** A sight glass offers visual confirmation of the tube's functionality, providing peace of mind and facilitating timely maintenance.

Unparalleled Hygiene, Simplified Maintenance

- **Accessible Filters:** The system boasts easy access to filters without requiring disassembly. These easily replaceable filters effectively eliminate over 99% of airborne viruses and bacteria (including coronaviruses/COVID-19), ensuring a cleaner and healthier environment.
- **Safe and Efficient Disinfection:** The UV-C lamps operate at a wavelength of 254 nm, offering a safe and environmentally friendly method of air disinfection without harsh chemicals. Additionally, the balanced design minimizes noise while maintaining optimal disinfection performance.
- **Adaptable to Diverse Needs:** We offer a variety of versions suitable for different installation spaces, ensuring adaptability to any ceiling configuration.

Easy to Use, Simple to Maintain

The integrated UV-C disinfection system within PRESTIGE prioritizes user-friendliness. Installation and operation are effortless, allowing you to focus on creating a safe and healthy environment for your occupants.

By combining exceptional lighting with cutting-edge air disinfection technology, PRESTIGE sets a new standard for comprehensive space management, fostering both visual comfort and a healthier environment.

Technical features:

- Type: air purifier UV-C
- Light source: 1x HNS L 36 W 2G11
- Wavelength: 254 nm
- Lamp lifetime: 9000 h
- Energy consumption: 36 W
- Filtration efficiency: 33* m3/h
- Noise level: < 25* dB
- Materials: Housing: sheet steel
- Accessories: Components for system PRESTIGE
- Weight: 5,0 kg
- Dimensions: 1480 x 70 x 76 mm

* Fan technical data.

Dimensions

Since the finding in 1878, artificially produced UV-C has become a staple method of sterilisation – one used in hospitals, airplanes, offices, and factories every day.

Crucially, it’s also fundamental to the process of sanitising drinking water; some parasites are resistant to chemical disinfectants such as chlorine, so it provides a failsafe.

UV-C radiation deforms the structure of genetic material in microorganisms such as viruses, bacteria, fungi, yeast or protozoa and prevents their particles from making further copies.

VIBA UV-C uses light sources with UV-C radiation in an enclosed space and therefore is ideal for use indoors and in the presence of humans and other living organisms (animals, plants). At the same time, it does not produce harmful ozone particles during operation.

Contaminated air enters through the suction openings, passes through the sterilization section in close proximity to the tubes (thanks to which a very short exposure time is required) and subsequently the sterilized clean air exits through the exhausts. In this way the air circulation in the room is ensured. The built-in replaceable filter provides additional air purification and at the same time prevents contamination of light sources.

VIBA UV-C is an ideal air disinfection solution for use in areas such as commercial spaces, offices, banks, restaurants, cafes, schools, kindergartens, libraries, medical facilities, spas, waiting rooms, beauty salons, hairdressers, hotels, households, museums, exhibitions premises, etc.
